Bitcast - Paid collaboration for YouTube Content

正文 Body

Hi [Creator Name],

I'm reaching out from Bitcast — a creator rewards platform that pays YouTube creators based on genuine watch time.

What creators typically earn:

- Dedicated (full) videos: \$400–\$2,000+ per video
- Integrations (brand mentions in existing content): starting from \$200–\$1,500

YouTube read-only access only — we never upload or control your channel.

These are typical ranges — if your content performs really well, you'll likely earn more.

How it works (3 steps, no agencies):

- Brands post campaign briefs (Bitget, Hyperliquid, Polymarket & more)
- You pick a brief and create a sponsored video or integration
- AI verifies your content and rewards you based on real audience engagement

I came across your YouTube content ([Channel Name]) — thought you'd be a great fit. I've attached our overview deck (PDF).

解释安全性 (Email / TG 通用)

I understand your concerns.

Just to clarify, Bitcast is not a traditional sponsorship marketplace where campaign approvals and payouts are manually decided by a team. Payouts are completely performance based, and issued automatically by validators on the network. The purpose of connecting a YouTube channel is to allow the system to verify channel ownership and measure campaign performance automatically.

We do not require access to manage your channel, upload content, or control your account in any way. The connection is strictly read-only.
