

Tutorial Video Guideline: Google Pay Binding Guideline

Put this in your caption or video description, and also your referral link in bio.

Limited-Time Offers & Registration

- **Invite Link:** *InsertLinkHere*
- **Pro Tip:** If registering directly via the App, make sure to enter invite code *CODE* to claim your \$5 reward!
- **Exclusive Discount:** Enjoy **20% OFF** when applying for both virtual and physical cards.
 - Virtual Card Code: VIRTUAL_CODE
 - Physical Card Code: PHYSICAL_CODE

How to find your codes:

- **Invite Link & Invite Code** → Open the RedotPay App → Home Page → 「**Invite Friends**」
 - **Virtual & Physical Card Promo Codes** → These are exclusively generated for you — **contact Kenny to get yours before you start promoting!**
-

Follow This Flow

1. Start with a Real Use Case

Open with a real payment scene using **Google Pay**.

e.g. convenience store, supermarket, restaurant, online shopping, or subscriptions like YouTube Premium, Google Play, ChatGPT Plus, etc.

- Recording your own screen or real-life payment works best — it feels authentic and relatable.
 - If you can't do that, use the photos and videos provided on Google Drive.
-

2. Make the Audience Curious

Hook your audience with something unexpected:

"Did you know? I just paid with Google Pay — but the money behind it was actually crypto / USDT, not a bank card."

Let them realize: **Google Pay can be linked to a crypto card.**

3. ✨ Introduce RedotPay Naturally

Bring in RedotPay in a natural way:

"This card is called RedotPay — a crypto Visa card that lets you top up with USDT or other cryptocurrencies, then link it to Google Pay and spend anywhere, just like a regular bank card."

Key highlights to mention:

- ☒ Works with Google Pay for NFC tap-to-pay
 - ☒ Works with Google Play, YouTube Premium & more
 - ☒ Top up with USDT / crypto — no bank account needed
 - ☒ Accepted at all Visa merchants worldwide
-

4. ➡ Show the Linking Steps (Tutorial Section)

This is the core of your video. **Walk viewers through the setup step by step** — screen recording recommended.

► Part 1 — Add RedotPay Card to Google Pay (NFC Payments)

1. Open the **Google Wallet** app (download from Play Store if needed)
 2. Tap 「Add to Wallet」
 3. Select 「Payment card」 → 「New credit or debit card」
 4. Scan your RedotPay Visa card or enter details manually:
 - Card Number / Expiry Date / CVV
 5. Agree to Terms & Conditions
 6. Complete verification via SMS or inside the RedotPay App
 7. ☒ **RedotPay is now linked to Google Pay!**
-

► Part 2 — Add RedotPay Card to Google Account (Google Play / YouTube Premium)

1. Open **Google Play Store**
2. Tap your profile picture → **「Payments & subscriptions」**
3. Tap **「Payment methods」** → **「Add a card」**
4. Enter your RedotPay Visa card details:
 - Card Number / Expiry Date / CVV
5. Fill in the Billing Address when prompted (*Singapore address*)
6. Tap **「Save」**
7.  **RedotPay card is now linked to your Google Account!**

► Part 3 — Linking Failed? Switch Google Play Country to Singapore

 *Only needed if Part 1 or Part 2 doesn't work in your country*

1. Go to **Google Play Store** → Tap profile picture → **「Settings」**
2. Tap **「General」** → **「Account and device preferences」**
3. Tap **「Country and profiles」** → Select **「Singapore」**
4. When prompted for payment, tap **「Skip」** or add your RedotPay card directly
5.  Wait **48 hours** for the region change to fully take effect, then retry

 **Heads up: Google only allows a country change once per year — make sure Singapore works for you before confirming!**

5. Explain the Benefits with Relevant Examples

Localize the message based on your country and audience.

For general users:

- Use USDT to pay via Google Pay — tap and go, no bank card needed
- Subscribe to YouTube Premium, Google Play games, AI tools, and SaaS services
- Turn your crypto into real spending power for everyday life

For Forex / Crypto traders:

- Withdraw USDT directly and spend it via Google Pay — no bank friction
- Use RedotPay to bypass bank restrictions on crypto-related transactions
- Transfer USDT to a local bank via P2P or Send for a better rate

6. 🚩 End with the Offer + CTA

Close with your discount codes and a clear call to action:

*"Use my code **[Virtual Card Promo Code]** for 20% off the virtual card, and **[Physical Card Promo Code]** for 20% off the physical card. Sign up with my referral link **[Link]** and grab a **\$5 bonus** too! Registration link is in my bio."*
